

KEYS TO Successful Open Innovation

WHAT IS OPEN INNOVATION?

"Open innovation is a paradigm that assumes that firms can and should use external ideas as well as internal ideas, and internal and external paths to market, as the firms look to advance their technology."

— DR. HENRY CHESBROUGH,
Professor at the Haas Business School
(Garwood Center for Corporate Innovation),
UC Berkeley, and Executive Director
for The Center for Open Innovation.

WELL-DEFINED GOALS should answer the following questions:

- What are the objectives?
- Who owns the results of the project?
- What are the problems that open innovation should solve?
- What are the timelines and milestones for the project?

HIGHER MANAGEMENT SUPPORT is crucial in achieving open innovation rollout across the whole organisation

ORGANISATIONAL CULTURE that supports and encourages looking to the outside for ideas and suggestions

COLLABORATION AND IDEA GENERATION starting with existing partners and networks, set the path for easy and trusted communication

PROFESSIONAL GUIDANCE (e.g. domain experts, consultants) is important for facilitation and discussion of ideas

TRUST in the organisation's ability to both value and act on submitted ideas and suggestions, and trust in their interaction with their peers
